Re: ReliaG® 800 (2024) – Addition of a Lens Guard

The addition of a lens guard has been put into place on our ReliaG 800, Model 2024 openers. The stainless steel guard can easily be clipped into place and reduces the possibility of unwanted entry of rodents and birds (issues customers have previously reported). This piece can be seen in production units on and after the serial number 0915932 and the date code 101243. The service part number for this piece is 38219R.S.
