Re: New Product Launch – Control Board Guard Kit

The Genie Company is pleased to announce the launching of the new control board guard kit. The new control board guard kit was designed to prevent accidental contact to the circuit board where AC power may be present. Mishandled tools or dropped hardware onto a circuit board can cause damage to the equipment. Have confidence when programming, reading codes, and/or adding/removing transmitters that the circuit board is protected from accidents. The kit can be retrofitted to most existing standard and heavy-duty X-Series operators.

Features & Benefits:

- Circuit board protection:
 - No accidental contact damage from screwdrivers.
 - Stops dropped screws, washers, or other metallic items from contacting the control board.
 - Spark UL 94 V-0 rated material prevents arcing that could damage the control board.
- Program the operator, read error codes, and add/delete transmitters without accidentally damaging the control board.
- Eliminate fuse replacements.
- Backwards compatible with most X-Series operator models. Exclusions include Fire Door and Explosion Proof operators.

Part Number: 113460.0001.S

Further Information:

- Brochures, shop drawings, user manuals and other accessory and operator information are available on geniecompany.com/commercial.
