Re: Serial Numbers Implemented on Units and Cartons

Beginning in production on 03/03/14, a new serial number identification process was implemented for commercial operators. The new number can be seen on motor cover label as well as the label on the carton.

- The previous 'Date Code' and 'MFD Date' format was: MM/DD/YYYY
- Both 'Date Code' and 'MFD Date' were replaced with 'S/N'.
- The new format is now:
 - Spaces 1 and 2: Year
 - Spaces 3-5: Day of year
 - Space 6: Plant#
 - Space 7: Shift#
 - Space 8: Production line#
 - Space 9-11: Consecutive number of unit as it ran down the line

As an example: 14035511050 – this unit was built February 4, 2014 (35th day of the year), at Plant #5, Shift #1 on production Line #1 and was the 50th unit built that day.

COMPANY	PART NO.
MODEL	PULL
HP	AMPS
PHASE	VOLTS
HZ	DATE CODE
 COMMERCIAL VEHICULAR DOOR OPERATOR LISTED 3000 	"Assembled in ____"
