FOR IMMEDIATE RELEASE

The Genie Company and RTI Announce Garage Integration

Mount Hope, OH – July 18, 2023 – [Genie®](#), the well-recognized brand of smart garage door openers, together with leading control and automation manufacturer [RTI](#), today announced a new integration enabling Genie’s full line of Wi-Fi enabled garage door openers powered by Aladdin Connect® to be controlled within RTI smart home control systems from RTI remotes, touchpanels, and mobile apps.

RTI is the award-winning control and automation solution for smart home and commercial applications, installed by a worldwide network of certified dealers. The new integration with Genie enables garage access to be managed through the same system that controls lighting, climate, entertainment, security, and other smart home features.

“The driveway and garage are primary home access points for most homeowners,” said RTI Product Director Neal Ellsworth. “Adding control of Genie devices to the RTI system delivers an important layer of control convenience in this important area of the home.”

More than just another way to open or close the garage, the integration with RTI enables scenes that provide a more intuitive home experience, such as turning on the driveway lights at night or notifying the homeowner if the garage door is left open.

“Working with RTI enables homebuilders and custom integrators to create a superior smart home experience for our shared customers” said Mike Kridel, President of The Genie Company.

“We’re excited about this partnership with RTI, and the ability to offer our customers an elevated smart home experience. ”

The full line of reliable, ultra-quiet, Wi-Fi enabled smart garage door openers and controllers by Genie are Works with Alexa and Google Home certified. The Genie line of residential garage door openers includes an award-winning wall-mount version that improves garage aesthetics and includes an automated garage door lock to provide an additional layer of security.
