Re: Miller Edge Tester (MET-101)

---

The Miller Edge Tester (MET-101) is now available. This device allows installers to quickly and easily verify the correct operation of an electric sensing edge. This device can test standard normally open 2-wire edges as well as DC terminated edges and 10K terminated edges. Simply connect the two edge wires to the two alligator clips, select edge type and press a button. The LED's on the tester will indicate the test results.

Part Number: 112509.0001.S  
Miller Edge Tester, MET-101

- Simplifies wiring identification
- Easy-read LED status indicators
- Auto shut-off saves battery life
- Easily replaceable 9V batteries
- Impact resistant for rugged environments
