Re: HPc Ratings & Product Nomenclature Updates: Notification 1

Beginning in January 2015, there will be changes implemented to the HPc ratings and general nomenclature of the Genie product line. In January, these updates will affect literature and website documentation. Labels on the product and their cartons will take on updated information once current inventories are exhausted. Additional PIBs will be issued once effective dates are in place.

Overview of General Nomenclature

Changes Coming January 2015

Today	January 2015 <i>Model Name Phase Out</i>
Model Name/Number	Model Number Remains
TriloG™ 1500, Model 4064	Model 4064
TriloG™ 1200, Model 3064	Model 3064
IntelliG® 1200, Model 4024	Model 4024
IntelliG® 1000, Model 3024	Model 3024
ReliaG® 850, Model 2028	Model 2028
ReliaG® 650, Model 1028	Model 1028

This change is a result of valuable input received from our customer base. The combination of the Model Name and Number will no longer be used. In January 2015, the Model Name will be phased out and the product will be referred to by its Model Number only. The Series Names (TriloG, IntelliG, and ReliaG) will remain but only as reference points in literature and websites to help group models together that have similar characteristics.

HPc Ratings Update

Changes Coming January 2015

Today	January 2015
HPc* Rating	HPc* Rating
1	1-1/4
3/4 +	1
3/4 +	1
3/4	3/4
1/2 +	1/2 +
1/2	1/2

After reviewing the original test data of our products and bench marking against our competitors, we have decided to adjust our HPc ratings. Our testing validated we were initially conservative with original ratings and this change will put those results more in line with the actual data we have.

Updated literature will be available after the beginning of January. An additional PIB will be issued when literature inventories have been updated and are available for order.

* Horsepower comparable (HPc) designates this garage door opener meets Genie's lifting force specifications for (1/2, 3/4, 1, 1-1/4) horsepower garage door openers. Horsepower comparable (HPc) Power Plus (+) designates this garage door opener exceeds Genie's lifting force specifications for (1/2) horsepower garage door openers.
