Re: Range Improvements: 3-Button Dual Frequency Remote

3-Button Auto Seek Dual Frequency Remote

The 3-button Auto Seek Dual Frequency Remote had a circuit board change in September of 2014 including a new antenna design. With this improvement, additional range capability will be recognized mainly by those who use this remote with legacy operators (390MHz).

These enhanced remotes went into units and accessory boxes as a series of rolling changes taking place as early as December 8, 2014 and as late as January 5, 2015.

To recognize if a remote has these updates, look for the following software version number on the back of the remote: SW: 2.0.6 or greater
