PIB# 072023
Division: Genie®
Product Family: Residential Opener Accessories
Product Series: Accessories (Aladdin Connect®)
To: All Genie Professional Line Wholesalers, Dealers and Installers
Re: New Feature Launch – Integration with Resideo Total Connect® 2.0

The Genie Company is pleased to announce that the Aladdin Connect smart garage door openers and controllers are now integrated with Resideo Total Connect 2.0, a leading platform to control security and smart devices.

Resideo Total Connect 2.0 provides total home control in a single app! In addition to garage door control, customers can keep an eye on their home while away with mobile management of their security system and compatible smart devices. Arm or disarm your security system, view high-quality live and recorded video, unlock/lock doors, turn lights off/on, adjust thermostat temperature, manage flood, window sensors, and smoke detectors all from inside the Total Connect app!

Key benefits of working with Resideo:

- **Smart Scenes** - Customize your home with a series of automated actions. Create an exit routine that adjusts the temperature and locks the doors. Or, run a bedtime routine that checks the garage door status, turns on outdoor lights and arms the security system.
- **Push Notifications** - Receive alerts when events happen such as extreme temperature changes, water leaks, motion detection, or doors opening.
- **Remote Control** - Arm or disarm your security system, unlock or lock doors, turn lights off or on, adjust thermostat temperature, and open or close garage doors from wherever you are.
