Re: New Product Launch – Light-Duty Trolley

The Genie Company is pleased to announce the newest addition to the Genie Commercial Line with the launch of the Light-Duty Trolley. Matched with the heavy-duty residential rail, the GCL-LT allows an easy-to-install, DC motor that raises the standards of the Genie Commercial Line. The commercial light-duty trolley offers several benefits including:

- Commercial photo-eyes with adjustable mounting bracket included in the box
- UL 325 Listed for commercial and residential applications
- Ability to use a monitored sensing edge in commercial applications
- When paired with a heavy-duty double c-channel rail, the GCL-LT allows for operation of a heavy door with minimal deflection
- Useable on standard lift sectional doors up to 14 ft tall and 750 lbs
- Soft start and stop reduces stress on the door and operator system
- GenieSense® monitoring and diagnostic technology detects irregularities in door operation by building and maintaining a force profile that is updated after every operation
- Power on demand gives extra power during key moments of the door's travel to give a smooth and consistent movement
- Smart illumination lighting positions the 2-bulb lighting system towards the inside of the garage for light where it's needed
- Standard wired wall console with Sure-Lock™ control to help prevent unwanted operator movement
- Optional battery backup & Aladdin Connect® can be easily added at any time
- Stores up to 31 Intellicode® transmitters
- Interchangeable with traditional residential chain and belt rails

Model Numbers: OPGLDT0011, OPGLDT0011W, OPGLDT0011WB

Further Information:

- Brochures, manuals, and shop drawings are located at geniecompany.com/commercial.
- Available to purchase without Aladdin Connect®, with Aladdin Connect, or with Aladdin Connect and battery backup
