Re: Replacement Circuit Boards (Rhine Units)

Previously, the below circuit board assemblies have always come with a plastic cover, such as the one shown in the image below (text by model). To help reduce the number of service board SKUs needed in the field, once these specific part numbers are depleted, they will no longer come with the plastic cover piece attached – it will be the board only.

The only added steps from the board with the plastic to the new part number is to remove 4 screws attaching the plastic to the board, gently pulling the antenna wire through and removing and reinserting force control shafts from the original board onto the new board.

Please note the two part numbers below that have already transitioned to a new part number with no cover.

37028E.S	Circuit Board (Black), Model 1024
37028G.S	Circuit Board (Blue), Models 1022/1042
37028A.S	Circuit Board (Black), Model 2024
37028C.S	Circuit Board (Blue), Model 2022 OBSOLETE use PN 39537R.S (no cover)
37028D.S	Circuit Board (Blue), Model 2042 OBSOLETE use PN 39537R.S (no cover)
37028J.S	Circuit Board (Gray), Model 2022-700 OBSOLETE (can use 37028L.S)
37028L.S	Circuit Board (Gray), Model 2027
