Re: Product Transition: Excelerator

With the release of our next generation of Genie residential openers, the IntelliG™ 1000 (belt or chain), IntelliG™ 1200 (belt or chain), the TriloG™ 1200 (direct drive screw), and the TriloG™ 1500 (direct drive screw), Genie is providing you with the newest in product innovation and security to offer to your customers. Our newest openers not only boast powerful and quiet DC motors but also include many enhanced technological features including an auto-seek dual frequency capability that can use either 315 or 390 Mhz, allowing for the best operating frequency to be used. Each unit is equipped with a 3 button remote featuring our latest Intellicode® 2 technology offering the greatest in security enhancement. The interchangeable rail system allows numerous installation configuration offerings to your customers.

The Genie Company would like to inform all Genie Professional Line customers that it will officially discontinue production of the Excelerator openers (Part #34125R & 34125S) from its offering.

The Genie Company will honor any applicable warranties with replacement parts, product or alternative product options for the Excelerator openers.

We wish to take this opportunity to thank you for your business and continued support. We look forward to discussing future opportunities and growth with our exciting new line of Genie residential openers. Should you have any questions, please contact your District Sales Manager.
