Re: New Feature Launch – Yonomi Smart Home Platform Compatibility

The Genie Company is pleased to announce that the Aladdin Connect smart garage door openers and controllers are now compatible with the Yonomi smart home app.

Yonomi app users can control their Aladdin Connect products along with more than 250 popular smart home products to coordinate operation. Yonomi allows users to set up routines that include geofencing to automatically open the garage door and turn on the exterior lights when arriving home. The Yonomi app also works with Siri, Alexa, and Google voice assistants.

To get started, download the Yonomi app on your iOS or Android device. Once Yonomi is installed on your phone, you can quickly and easily sync your existing smart home devices to your account, including your Aladdin Connect compatible garage door openers and controllers. After your devices have been added, you can design the perfect smart home routine for every time of day.

Want to make sure the garage is always secured before you head to bed? Try a “Goodnight” routine that turns off the lights, locks the door, and closes the garage while you get ready to hit the hay. For more routine recommendations, check out the “Ideas” tab in the Yonomi app.

Yonomi, is a trademark of Yonomi, Inc.
