Re: New IntelliG® and TriloG™ Board Updates

To further clarify information provided in PIB 4379 regarding the updated boards for the IntelliG and TriloG units (dates, serial numbers, Toroid Ferrite/compatibility):

Here are the old and new board part numbers:

Model Name	Old PN	New PN
TriloG 1500	37470R2.S	38001R2.S
TriloG 1200	37470R1.S	38001R1.S
IntelliG 1200	37470R4.S	38001R4.S
IntelliG 1000	37470R3.S	38001R3.S

Please note the absence of the Toroid Ferrite (identified below) on the power cord. This piece was required with the old boards but is not required with the new boards.

Power cord from unit with old board

Toroid Ferrite

Power cord from unit with new board

In addition, new boards are backwards compatible to older units with power cords that have the Toroid Ferrite. Use of the older boards is not permitted without this piece as it would not be compliant with FCC/regulatory requirements.

New boards and Series II Wall Consoles can be seen in units with a serial number **AS EARLY AS 122494110518** (production date 09/05/12). **ONLY** new boards and Series II Wall Consoles can be found in units with serial number 122684110001 (production date 09/24/12) and after.
