Re: New Product Launch—Models 2128 & 1128 with Integrated Aladdin Connect

The Genie Company is proud to introduce Models 2128 & 1128, our newest 24V operators now with Integrated Aladdin Connect! These operators feature the industries most desired features in a smaller, easier to install platform.

These models provide the perfect operator for those installations where Wi-Fi capabilities are desired, but a smaller, easier to install footprint is needed for the application. Even with the smaller footprint, these operators still feature Genie's 24V motor capable of lifting doors up to 500 lbs. (2128) and 350 lbs. (1128) for doors up to 8 feet in height. Speed is not sacrificed with the 2128 capable of 7"/second and the 1128 lifting at up to 6.5"/sec. The 2128 and 1128 accommodates belt and chain drive rails and either can be used on any 2128 or 1128 operator. The most exciting new feature is that these models will come standard with integrated Aladdin Connect, Genie's Wi-Fi connectivity technology.

These models use advanced chip technology which improves and simplifies the installation of the Wi-Fi and smartphone set-up. In most cases, setup of the Wi-Fi will take less than five minutes.

Description: Model 2128 (Belt/Chain)
Part Number: 40707S

Description: Model 1128 (Belt/Chain)
Part Number: 40707R

Standard Features:

- Integrated Aladdin Connect

Aladdin Connect Benefits:

- **Security** – Instantly know if someone is operating your garage door without permission.
- **Convenience** – Open your door for family members, deliveries or service providers from anywhere with your smart device or set up virtual keys so they can let themselves in. Other features include a scheduled time for your door to close or a maximum amount of time that it will stay open.
- **Tracking** – Know both the date and time of each operation of your garage door.

This operator will be available to order from your Genie source as of May 1st, 2019
