 To: All Genie Professional Line Wholesalers, Dealers and Installers  
 Re: Where is a Brake Standard? Can It Be Added Later?

---

The Genie Company offers many of our commercial operators with brakes optional. This is done to providing as much flexibility to our customers as possible. The following information has been provided to help avoid confusion on which units come with, and without brakes standard.

Please review the chart below as a general reminder of which GCL units have the option for a brake to be added (and when) and which operators come standard with this feature.

Please note in the MT model, a brake can be ordered with this operator, however, it must be ordered from the factory with brake. Unlike the other models, **a field kit cannot be installed later on the MT** – it **must** be installed from the factory.

Model	Horsepower Rating			
	1/2 HP	3/4 HP	1 HP	3 HP
<b>GCX</b>				
<b>MT</b>	Can be added*			
<b>MJ</b>	BRAKE			
<b>MH</b>	BRAKE			
<b>T</b>	Optional <sup>‡</sup>	BRAKE	BRAKE	
<b>J</b>	Optional <sup>‡</sup>	BRAKE	BRAKE	
<b>H</b>	Optional <sup>‡</sup>	BRAKE	BRAKE	
<b>GT</b>	BRAKE	BRAKE	BRAKE	
<b>GH</b>	BRAKE	BRAKE	BRAKE	BRAKE

**Optional\*** : You can order an MT with or without a brake.  
 You cannot field install a kit later- it must be installed at the factory

**Optional<sup>‡</sup>** : You can order these openers with or without a brake. You can install a field kit later if needed. See option #s 01 and 02 in the pricing catalog.

**BRAKE** : These openers are standard with a brake. There is no other option.
