Re: New Product Launch - Heavy-Duty Rail

The Genie Company is pleased to announce our latest addition to the residential product category, the heavy-duty rail.

The new rails have been designed to help prevent against rail deflection on the industry's largest and heaviest residential doors. While the traditional c-channel design remains, the heavy-duty rail will also include a second reinforcement layer to provide additional strength and rigidity.

Since the c-channel design remains consistent, these new rails can be added to any of Genie's existing openers making for a universal, easy-to-inventory product family. Additionally, all sizes and types (chain, belt, screw) are available, so you can be certain that you have the right product for the job every time.

If you have any concerns or questions, please contact your Customer Care Representative or your local Genie Sales Representative.

	RAIL	PN
Chain	7' Chain	40698R
	8' Chain	40698S
	10' Chain	40698T
	12' Chain	40698U
