Re: New Feature Launch – Integration with RTI smart home control systems

The Genie® Company is pleased to announce that Aladdin Connect® smart garage door openers and retrofit kits are integrated with [RTI](#), the personalized and responsive smart home control and automation system. This new integration brings peace of mind and simplicity to the smart home. Genie's full line of Wi-Fi enabled garage door openers powered by Aladdin Connect® can now be controlled from RTI's systems including the elegant, and intuitive Coral control panel.

RTI's control and automation solutions for the smart home and commercial applications now includes Genie garage access. Key benefits include:

- **Peace of Mind** - Feel welcome and safe when coming home to a well-lit house. RTI smart home control provides responsive and personalized control.
- **Outdoor Control** - Extend the comforts of home to your outdoor spaces, including your driveway, the primary point of access for most homeowners and an essential part of your lifestyle.
- **Unified Experience** - View security cameras, turn on the lights, let the delivery person into the garage, and lock up once they've left. From across town or across the world, stay connected with RTI smart home control.
- **Intuitive Technology** – Know if someone is in the driveway using advanced video analytics. Identify if it is a family member using facial recognition.
