Re: New Product Launch – Model 3124H and 3124H-B with Integrated Wi-Fi

The Genie Company is excited to announce the launch of the new Model 3124H. One of our most popular 140V DC models, now available with integrated Wi-Fi! The Model 3124H features the industry's most powerful DC motor, Battery Backup compatibility, and now Aladdin Connect®.

This model comes standard with integrated Aladdin Connect Wi-Fi smart phone control capabilities, and a 140V DC motor capable of operating residential garage doors up to 750 lbs. The Model 3124H is ready to accept the battery backup accessory any time you or your customer sees fit, while the 3124HL-B comes with the battery backup unit already inside the box

Additionally, both operators offer all the same benefits as existing 3024H and 3024H-B models, such as a standard 6' power supply and universal preassembled rails with a pre-tensioned chain or belt in sizes up to 14'. The new models also feature the same easy set-up and programming that is so popular across the entire Genie Residential Line-up.
