---

The Genie Company is pleased to announce the release of additional remotes into the Genie Professional Line transmitter family. Starting March 10, this product will be available for order from your source for Genie operator products!

### Features & Benefits

- Patented dual frequency Intellicode® technology (315/390MHz)
- Answers 'Voice of Customer' Request for larger buttons and larger overall sizing
- Buttons have a very distinct tactile feel and make an audible clicking noise when pressed
- An LED on the remote is clearly visible and lights with each button press
- Visor style with a horizontal button layout and a multi-directional visor clip on the back to fit any preferred visor placement
- Compatible with all versions of HomeLink®
- Models G2BT-P and G4BT-P are compatible with all residential Intellicode openers/receivers since 1995 and all commercial Intellicode receiver boards from 2014 and later
- Model GOCS-P is compatible with commercial operators with Intellicode receiver boards from 2014 and later
- Programming steps and battery type (CR2032) are consistent with other Intellicode remotes.
