Re: C-Channel Rail Travel Increased:
 Increase Rail Length, Shortened Trolley

Over the last several months the following upgrades have been made to Genie C-channel rails which have resulted in greater travel length.

- All C-channel rails for 9' door height and greater have been lengthened 5.00" or more.
- The trolley on C-channel chain and belt rails have been decreased in length by 1.25" which results in additional travel capacity on the rail.

The chart below (figure A) details the changes in overall rail length taking effect now. These changes are taking place at various dates between the middle of last year and throughout 2014 as new rail inventory is produced and made available. The illustration below (figure b) highlights the size difference between the old and new trolley design for chain and belt C-channel rails.

Figure A.

Part#	Description	Before	After
37060T	10' IntelliG Chain	152.25	157.75
37060U	12' IntelliG Chain	176.25	181.75
37060V	14' IntelliG Chain	200.25	205.75
37061W	9' IntelliG Belt	140.25	145.75
37061T	10' IntelliG Belt	152.25	157.75
37061U	12' IntelliG Belt	176.25	181.75
37061V	14' IntelliG Belt	200.25	205.75
37062T	10' Screw Drive	148.50	153.50
37062U	12' Screw Drive	172.50	177.50
37062V	14' Screw Drive	196.50	201.50
