Date: Sep 24, 2024
PIB# 092424
Division: Genie®
Product Family: Residential Opener Accessories
Product Series: Accessories (Aladdin Connect®)
To: All Genie Professional Line Wholesalers, Dealers and Installers
Re: New Feature Launch – Integration with GeoKey, a leading property access company

The Genie Company is pleased to announce that the Aladdin Connect smart garage door openers and controllers are now integrated with GeoKey®. GeoKey is a hardware agnostic mobile access control solution, giving property owners and operators the ability to control all access points and simplify operations across multiple locations and complexes.

GeoKey targets multi-family and student housing markets as a retrofit or new construction solution and integrates gates, garages, intercoms, interior and exterior doors, elevators, mail rooms and storage.

Key benefits of working with GeoKey:

- **Mobile Access Control** - Full management software to send, retract, or limit mobile access for each user. No firmware updates or onsite programming required. Remote touring, battery life checks, and much more all through the cloud-based portal.
- **Geofence Technology** - Patented technology that doesn't require card readers for pedestrian door access. GeoKey stands for geolocated keys.
- **Resident Experience** - Using the move in dates set in the property management system, GeoKey sends an automated email and text message prompting residents to log in. Easy to get started and even easier to use.
- **Enhanced Security** - Three-factor authentication provides a secure approach to manage campus access credentials for residents, staff, and maintenance.
