Re: Loop Detector Kit

---

The 24V AC Loop Detector Kit (P/N 540052.0002.S) contains the loop detector and 2 harnesses (one 1ph and one 3ph) that allow you to power the loop detector with 24VAC. The harness plugs into the extra connector and allows power to be pulled from the transformer of the GCL-T/J/H or the GCL-GT/GH circuit boards.
