Re: New Product Release – 1-Button Dual Frequency Remote Model G1BT

The Genie Company is pleased to announce the release of our new 1-Button remote! Starting November 20, this product will be available for order from your source for Genie operator products.

Features & Benefits:

- Patented dual frequency technology (315/390MHz) automatically finds the optimal frequency to eliminate unwanted interference
- Larger general size fits perfectly in the palm of your hand
- Button has a very distinct tactile feel and makes an audible clicking noise when pressed
- The LED on the remote is clearly visible and lights with each button press
- Programming is the same as any other Genie Intellicode remote
- Compatible with all versions of HomeLink®
- Compatible with all Genie Intellicode® residential and commercial products since 1995
- Consistent battery type of CR2032 coin cell
- Service part numbers:
 - Battery door screw: 41427A.S
- Visor style with a horizontal button layout and a multi-directional visor clip on the back to fit any preferred visor placement

Multi-directional slots for visor clip
