## **The Genie® Company Unveils New Linear Actuator Gate Operator for Residential Applications**

*Smart. Durable. Built for Real-World Performance—With More to Come*

**Mt. Hope, OH (May 15, 2025)** — Genie®, a leading innovator in garage door openers and home security products, proudly announces the release of its newest innovation: a **residential linear actuator gate operator** designed for reliability, efficiency, and ease of installation. This launch marks the first release in a new lineup of smart, professional-grade gate operators coming soon from Genie.

Engineered for swing gate applications, Genie's linear actuator model is powered by a 24VDC motor system that supports 115/230VAC operation and is also compatible with optional solar power kits—offering flexible installation choices and energy-conscious performance.

### **Smart Home Ready with Aladdin Connect®**

This operator features state-of-the-art integration capabilities, including optional Wi-Fi connectivity via Aladdin Connect enabling remote monitoring and control from anywhere. With Aladdin Connect, homeowners can remotely monitor and control their gate, check its status, and receive real-time alerts—all from their smartphone.

### **Reliable Performance, Simple Installation**

Designed with both homeowners and installers in mind, Genie's linear actuator model offers dependable operation in a compact form, ensuring straightforward installation and durable performance.

### **More Innovations Ahead**

The launch of the linear actuator model is just the beginning. In the coming months, The Genie Company will unveil a **complete line of residential and commercial gate operators**, including slide gate and articulated arm swing models. Each will feature high-performance capabilities and smart connectivity options, continuing Genie's tradition of innovation.

"This release reflects Genie's commitment to delivering advanced, dependable access solutions that meet the evolving needs of today's homeowners," said Mike Noyes, President, the Genie Company.

"We're excited to expand into the gate operator market with technology-forward products built on the trusted Genie legacy."

###
