

## PRODUCT INFORMATION BULLETIN

Date: August 1, 2017  
Number: 11916  
Division: Genie®  
Product Family: Residential Opener Accessories  
Product Series: Accessories (Safe-T-Beam® System)  
To: All Genie Professional Line Wholesalers, Dealers and Installers  
Re: Product Improvement: Safe-T-Beam® System

---

The Safe-T-Beam® (STB) system has undergone some improvements in the last year.

**Spring 2016** – The tube was lengthened and the beam was narrowed to help reduce nuisance reversals caused by light infiltration.

**Fall 2016** – A conformal coating was added to the circuit board inside the STB to make them less susceptible to damage caused by moisture (i.e. hosing down garages).

**Spring 2017** – Voice of the Customer feedback indicated a possible issue with bugs gaining access to the tube opening and causing nuisance reversals. In the spring of 2017, a circular lens was placed inside the tube that prevented bugs from making their homes inside the holes of the STBs.

Alternatively, for those STBs already in the field that may have been experiencing bug issues, snap on lens that fit over the end of the STB tube are also available for retrofit situations.
