Re: New Feature Launch – Integration with Universal Remote Control (URC), a leading smart home control and remote-control company

The Genie Company is pleased to announce that the Aladdin Connect smart garage door openers and controllers are now integrated with Universal Remote Control (URC), a leading smart home automation and control solutions company.

URC technology is respected for unsurpassed performance and reliability with over 100 million remote controls sold in the past 10 years. URC user interfaces include tabletop controllers, in-wall touchscreens, handheld remotes, keypads and mobile apps. URC systems are custom designed, installed and maintained by a network of URC trained systems integration professionals.

Key benefits of working with URC:

- **Unified Remote Control** - Use URC's Total Control® system for all-in-one control of the entire smart home -- lighting, thermostats, locks, garage door openers, security cameras, and more.
- **Security from Anywhere** - Check if the garage doors are closed, and open or close them from any room with Total Control and URC controllers
- **Simplified Home Automation** - Secure the entire home with a tap or voice command by creating home automation scenes. Example scenes include a "Leave Home" or "Goodnight" scene that would close the garage doors, lock the front door, turn off lights, and adjust the thermostat.
- **Geofencing** – Automate actions to provide peace-of-mind when entering or leaving the garage. Automatically open as the homeowner nears or closes when leaving the property, or trigger notifications if the garage is prevented from closing or opened unexpectedly.
