Re: New Product Release – 3-Button Dual Frequency Remote

The Genie Company is pleased to announce the release of our new 3-Button remote! Starting May 16th, this product will be available for order from your source for Genie operator products!

Features & Benefits:

- Patented dual frequency technology (315/390MHz) automatically finds the optimal frequency to eliminate unwanted interference
- Larger general size fits perfectly in the palm of your hand
- Larger button size makes finding the button easy, even if you aren't looking!
- Buttons have a very distinct tactile feel and make an audible clicking noise when pressed
- An LED on the remote is clearly visible and lights with each button press
- Visor style with a horizontal button layout and a multi-directional visor clip on the back to fit any preferred visor placement
- Compatible with all versions of HomeLink®
- Compatible with all Genie Intellicode® residential and commercial products since 1995
- Programming is the same as any other Genie Intellicode remote
- Consistent battery type of CR2032 coin cell
- Service part numbers:
 - Battery door screw: 41427A.S

Part Number: 41538T

Model: G3BT-P

Description: 3-Button Remote, 315/390MHz
