Re: New Product Release – Universal Wireless Wall Console

The Genie Company is pleased to announce the release of our universal wireless wall console! Control the most popular brands of garage door openers from the last 20+ years. Starting March 7th, this product will be available for order from your source for Genie operator products!

Features & Benefits:

- Control the most popular brands of garage door openers such as LiftMaster®, Chamberlain®, Genie, Overhead Door™, Wayne Dalton®, Linear®, plus more!
- Compatible with most rolling code and fixed code dip switch products since 1993 (working safety sensors required)
- Control up to 3 different garage door opener brands from a single wireless wall console!
- Minimize inventory needs in the warehouse and on the service truck – one wall console for service needs!
- Use the “Jogger Button” (DELAY button) with any of the DOOR buttons – press up to 3xs for a max 20s before the door begins to move.
- Optional backlighting makes the console easy to locate in a dark space; turn off for maximum battery life; turns red indicating low battery status
- Service part numbers:
 - Battery door cover: 41402A.S
- IMAP \$37.99

Part Number: 41551R
