**Date:** October 11, 2022  
**Number:** 10112022  
**Division:** Genie®  
**Product Family:** Commercial Operators  
**Product Series:** Accessories  
**To:** All Genie Professional Line Wholesalers, Dealers and Installers  
**Re:** New Product Launch – RBand Wireless Edge Kits

---

Genie is pleased to announce launch of the new MillerEdge® RBand Wireless Edge Kits for T3/DC and T2 type edges. The T3/DC wireless edge kit (OPAKRWET3.S) replaces the MEL-II edge kit (OPAKGMMWE2.S) which has been discontinued. Also, now available is a T2 type edge kit (OPAKRWET2.S) for retrofit applications where a door has an existing T2 type edge. RBand wireless kits offer improved RF interference immunity with a bi-directional link, better low battery indication with an audible indication versus visual LED indication, and NEMA 4 transmitter, built to endure wet environmental conditions. The converter is only supplied with the T3/DC kit and is also NEMA 4. T3/DC edges and wireless edge kits will still be the default when configured with an operator. The T2 RBand wireless edge kits are available as a line-item order.

**Description:** RBand Wireless T3/DC Edge Kit  
**Part Number:** OPAKRWET3.S

**Description:** RBand Wireless T2 Edge Kit  
**Part Number:** OPAKRWET2.S

### Features:

- Easy to configure with on-board diagnostics for troubleshooting and setup
- UL 325 Listed for use on Genie Commercial Line Operators that can use an edge
- Both kits can be configured as normally open output for non-monitored applications
- 916 MHz operating frequency and 135 millisecond response time
- 50' nominal range and 100' max range under optimal conditions
