Re: Aladdin Connect® now includes Dealer Business Cards

Digital business cards are now available in the Aladdin Connect app. Consumers can use the app to add a dealer's business card to their account, making it easy for them to contact their dealer when their door needs service.

From the main menu consumers can add dealer information; first search for gold dealers by company name or zip code and then select the preferred dealer. During installation or a service visit, dealers are encouraged to setup the customer with the app and make sure your company has been added to their "My Dealer" screen.

This feature in the app is offered to all Genie gold dealers. Check the dealer locator on geniecompany.com to check if your company has gold status. Not a gold dealer? Contact your salesperson to learn how to qualify.
